Name: Ozone (O3) **Measure:** Mean **How Calculated:** Air samples collected at specific NYCCAS monitoring sites along with information about emissions sources were incorporated into a statistical model that predicted pollutant concentrations at all locations in NYC for the specified time period. The results were then assigned to the appropriate NYC neighborhood and averaged. In NYCCAS, ozone is measured in units of parts per billion (ppb). **Source(s):** New York City Community Air Survey **Year:** Summer 2009

Name: Ozone (O3) **Measure:** 10th Percentile **How Calculated:** Air samples collected at specific NYCCAS monitoring sites along with information about emissions sources were incorporated into a statistical model that predicted pollutant concentrations at all locations in NYC for the specified time period.
