Name: Nitric Oxide (NO) **Measure:** Mean **How Calculated:** Air samples collected at specific NYCCAS monitoring sites along with information about emissions sources were incorporated into a statistical model that predicted pollutant concentrations at all locations in NYC for the specified time period. The results were then assigned to the appropriate NYC neighborhood and averaged. In NYCCAS, nitric oxide is measured in units of parts per billion (ppb). **Source(s):** New York City Community Air Survey **Year:** Annual Average 2009

Name: Nitric Oxide (NO) **Measure:** 10th Percentile **How Calculated:** Air samples collected at specific NYCCAS monitoring sites along with information about emissions sources were incorporated into a statistical model that predicted pollutant concentrations at all locations in NYC for the specified time period. The results were then assigned to the appropriate NYC neighborhood and the 10th percentile determined. In NYCCAS, nitric oxide is measured in units of parts per billion (ppb). **Source(s):** New York City Community Air Survey **Year:** Annual Average 2009

Name: Nitric Oxide (NO) **Measure:** 90th Percentile **How Calculated:** Air samples collected at specific NYCCAS monitoring sites along with information about emissions sources were incorporated into a statistical model that predicted pollutant concentrations at all locations in NYC for the specified time period. The results were then assigned to the appropriate NYC neighborhood and the 90th percentile determined. In NYCCAS, nitric oxide is measured in units of parts per billion (ppb). **Source(s):** New York City Community Air Survey **Year:** Annual Average 2009
